

New ScotSAC Chapter Formed

MANY DIVERS using the Pitstop Cafe at Arrochar on a Sunday morning may have recently noticed a group of divers wearing some unusual headgear. These individuals belong to the unofficial Murmansk Chapter of the ScotSAC Glasgow South Branch which was recently formed in an attempt to strengthen international links.

The members concerned are, from top right in a clockwise direction, that well known ScotSAC Board Member Archelski Gillies, Ianski Campbell, Patski Gallacher & Andski Welsh. The photograph was taken at St Catherines, Loch Fyne by Lee Simpson who declined to wear one of the hats in question. Wearing a rubber suit on a Sunday Morning makes him look silly enough.

CONGRATS!

WELL DONE Christine Flynn on becoming a Sport Diver. Congratulations from all the branch instructors at Auchenhavie SAC.

Congratulations to Anne Walker, Gordon Irving and Scott McDiarmid of Dumbarton Branch who have all achieved their Sports Diver qualification.

PROFESSIONAL

Bluefin FX1/Z1
Professional Bluefin FX1/Z1 **£3959**

Its What We Do

HD
HIGH-DEFINITION

The Stingray HD has been carefully engineered with the primary goal of making it easy to learn and use for the new videographer. The Stingray HD also adapts to your future Sony video cameras. So simple to use, it makes capturing underwater video images a breeze. With the design benefits of non-penetrating electronic controls it eliminates the risk of housing leaks typical with mechanical through-hole designs. The standard 3.5" high-resolution monitor back gives an easy view of what you're shooting. Our modular camera trays allows the Stingray HD housing to adapt to nearly the entire line of Sony HD video cameras—while allowing accurate camera positioning to take advantage of Light & Motion's high quality optics.
